CTDS Cell Freeze

CTDS Cell Freeze is a cell cryopreservation solution intended for freezing and recovery of mammalian cells under controlled laboratory conditions.
Specialty culture media help tailor the extracellular environment to a defined cell type or research workflow.
Appropriate formulation selection can simplify the development of consistent culture conditions.

CTDS SKU	CTDSK940
Pack size	100 ml
Product category	Cell Culture Media
Product subcategory	Cryopreservation Media

PRODUCT BACKGROUND

CTDS CellFreeze is a cell cryopreservation solution intended for freezing and recovery of mammalian cells under controlled laboratory conditions. It is useful for banking, transport preparation and routine preservation of validated cell lines or primary cells when used with an optimized freezing protocol. For research, process development and manufacturing support use; final supplementation should be optimized as per cell line and protocol.

APPLICATIONS

Used in cell culture applications

CHARACTERIZATION AND QUALITY INFORMATION

Assay / validation method	Flow cytometry marker characterization

HANDLING AND STORAGE

Shelf life	12 months
Shipping	Shipped on gel pack
Storage	Store at 2-8°C
Intended use	For Research, Laboratory and Industrial Use Only. Not for Diagnosic Use

PRODUCT DISCLAIMER

The data and recommendations are based on validation done in our laboratory. It is recommended for users to establish their own parameters of culture independent of our claims. These reagents are for research use only and not for in-vitro diagnostics or human use.

ADDITIONAL CLASSIFICATION

Product grouping	Serum-Free Media (SFM)
Product subgroup	Other Medias / Reagents

Not a lot-specific certificate of analysis.
